Welcome to the 2014/15 Page Personnel Salary & Employment Forecast report.

Consistent with previous years, this report provides business support professionals with useful insights into salary forecasts and expectations, hiring intentions and recruitment challenges over the next 12 months.

Our national annual salary survey, completed

by more than 300 employers this year, covers a range of issues and trends relevant to today's corporate sector and establishes the *Salary & Employment Forecast* as a highly reputable, market-leading report, based on in-depth national research. Whilst there are a number of current industry surveys that provide qualitative insight on hiring intentions and salary levels, the *Page Personnel Salary & Employment Forecast* combines quantitative and qualitative research with our extensive involvement in the business support employment market. Our clients come from all major industry sectors and range from market-leading multinationals to small and medium-sized enterprises.

Consistent with our specialist approach to recruitment, where we have dedicated teams of specialists servicing each discipline, market or industry sector, the report provides detailed salary guides for each discipline and industry. Salary tables divide job types by 'years of experience' or 'size of organisation' to show accurate and concise salary ranges.

The results of our online survey to employers are represented visually through the use of infographics. The market observations that accompany these are based on the extensive knowledge of our senior leadership team at Page Personnel.

The report also features a range of employer insights on everything from workplace benefits and working hours to attraction and retention strategies. It forms part of a suite of salary tools, advice and information available to the market from Page Personnel. Some of the key features on offer include:

- A Salary Centre to help you stay up-to-date with the latest salary rates, job market trends and expert salary advice.
- Salary calculators to help you calculate your salary after tax, or find out the difference a pay rise would make.
- A Salary Appraisal Service, providing a personalised, one-on-one assessment of your current market value.

All of these features can be found at the Page Personnel Salary Centre at pagepersonnel.com.au/salary-centre

I wish to thank everyone who contributed to this year's *Salary & Employment Forecast* and trust you will find it helpful and informative. We welcome your feedback and encourage you to contact us for further information, market-specific advice, or a Salary Appraisal Service at pagepersonnel.com.au/contact-us

Kind regards,

Matthew Cook Managing Director, Page Personnel Australia

Introduction

After three years of challenging recruitment conditions the employment market in Australia has stabilised in 2014. As the year unfolds it looks increasingly likely that these employment market conditions will continue throughout the next 12 months.

A number of emerging drivers outlined in the Page Personnel Australia 2014/15 Salary & Employment Forecast are influencing the business support market.

Report details - Some key findings

The Page Personnel Australia 2014/15 Salary & Employment Forecast found nearly a third of surveyed employers plan to increase headcount in the next twelve months but emerging conditions could see this figure increase.

Three years of efficiency projects and restructuring have left many teams leaner than ever before.

Page Personnel Australia has identified several important drivers of the business support market over the coming year:

- Increasing business confidence and a strengthening economy.
- A permanent loss of roles to overseas locations.
- A growing restlessness among quality professionals.

Increasing business confidence and a strengthening economy

Current economic data suggests the Australian economy is performing well by global standards and is forecast to strengthen in 2015. In line with this we are beginning to see companies slowly shift from a defensive business strategy focused on cost control to pushing for a position of revenue growth across the Australian market.

A period of strong employment activity in the professional services sector confirms this positive outlook. Historically, this sector acts as an early indicator of economic growth. For example, the recovery of the UK economy 18 months ago began with a noticeable uplift in activity for law, accounting and consulting firms which has been sustained over time.

Meeting this demand for growth are people who are increasingly eager to secure a new opportunity after inconsistent market conditions over the past few years. Many people across Australia have been working in 'holding jobs' that do not necessarily align

with their career goals. As business and consumer confidence builds, people will act on this pent-up demand to make a career move.

As jobseekers gain confidence in their ability to attract more than one job offer, they will in turn naturally reassess their worth in the market, and this is a key factor behind the growth in salaries.

Permanent off shoring

The trend of corporate restructures that dominated 2012-2013 is showing signs of slowing as companies complete projects to offshore key functions. The most popular destination for offshoring is Asia, particularly the Philippines and India. 32% of employers surveyed report that their company operates with a Shared Service Centre (SSC).

An emerging trend is for companies to offshore key functions but to retain a small core team of experts in Australia. For example a credit function may be offshored to India but a small, highly skilled team of credit controllers will be retained in Australia to deal with exception items and problematic accounts. The loss of roles offshored to SSCs marks a permanent shift in the local employment landscape, as these jobs are unlikely to ever return to our shores.

State by state – NSW leading the charge

Since the mining slowdown, the hottest recruitment activity has moved east, with New South Wales (NSW) leading the charge. Strong public and private sector investment in infrastructure is at the heart of the push behind the NSW market. In turn, NSW Government agencies have been extremely active in the market looking to drive change and improvement in the sector. This is pushing demand for skill sets not necessarily seen in the government space previously. It is also worth noting that both financial services and retail have outperformed versus expectation and continue to demonstrate consistent recruitment demand.

Queensland is also looking buoyant despite the national drop in mining activity. The Sunshine State is now a diverse economy that drives professional employment opportunities across multiple sectors in a similar way to both Sydney and Melbourne.

State by state – NSW leading the charge *(continued)*

The brightest spot has been the emergence of large corporate structures focused on managing the infrastructure now in place to drive the oil and gas exploration which has come on-line. Equally, the retail market continues to develop particularly at the luxury goods end.

The recruitment outlook in Victoria is more challenging where heavy job losses within the manufacturing sector, particularly the automotive industry, have dented general business confidence as a whole. To a certain degree the performance of the construction sector driven by strong residential/apartment property sales has countered the manufacturing decline. Equally, there are some positive early signs in the 'emerging' private sector through investment into retail, property and social infrastructure sectors — namely, aviation, education and healthcare markets. Dissimilar to NSW, public sector growth is subdued at present in Victoria, potentially affecting the small to medium industries. However in Victoria, sector mobility for professionals seeking a new career opportunity is sometimes difficult to achieve.

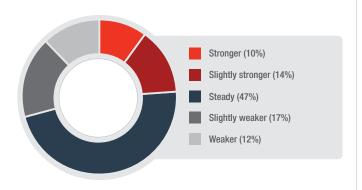

In Western Australia (WA), the wide-reaching impact of the mining slowdown continues to be felt across recruitment in this state. Despite this, early signs of stabilisation are now appearing however the mid to long term outlook will continue to be challenging as the WA employment market adjusts to the decrease in demand driven by mining and resources.

Looking ahead ...

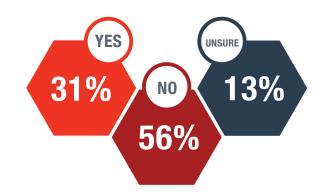

With clear signs that the domestic job market is becoming both more consistent and active, the outlook for the coming 12 months is very positive. As business confidence continues to grow and companies revise their hiring requirements, the demand for quality professionals is likely to grow.

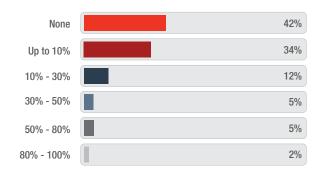

Strength of current hiring activity compared to the last 12 months

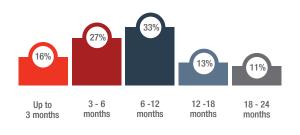

Expecting to increase headcount

Percentage of team employed on contract/temporary basis

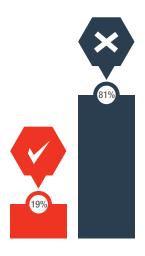

Average length of contract/temporary period

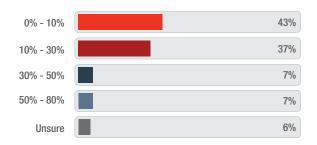

Note: All infographics in this report are based on the views of survey participants. The accompanying market commentary is based on the experience and observations of the Page Personnel team.

^{*} More than one option could be selected.

WORKING HOURS

Change in average weekly working hours over the last 12 months

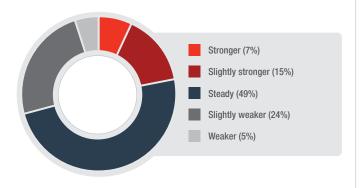

Main reason for increased working hours

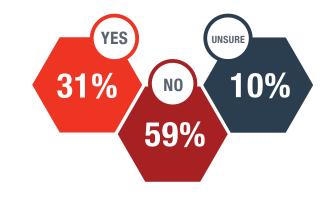

^{*}redundancies, increased workload, etc.

Strength of current hiring activity compared to the last 12 months

Expecting to increase headcount

Market observations:

- Currently, overall hiring activity for customer service professionals is strong, and this is expected to continue over the next 12 months.
- A strong level of hiring activity is occurring within NSW, specifically
 across the financial services sector. In VIC, recruitment is most robust
 within manufacturing. On a national level, employers in financial
 services, retail/consumer goods and manufacturing are most active in
 hiring customer service professionals.
- Recruitment for customer service professionals is being driven by a greater definition between sales and customer service functions, with organisations specifically hiring customer service professionals to undertake non-revenue generating activities.
 Also, businesses focused on eCommerce are hiring additional customer service and administrative staff to support the ongoing transition to online platforms.
- Consultant level customer service professionals, Order Processing
 Officers and outbound professionals are currently in highest demand
 and will continue to be sought-after in the coming year.
- Professionals with a technical focus on customer service are particularly in high demand.

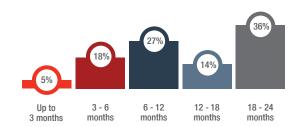

Percentage of team employed on contract/temporary basis

None 47% Up to 10% 29% 10% - 30% 10% 30% - 50% 55% 50% - 80% 7% 80% - 100% 29%

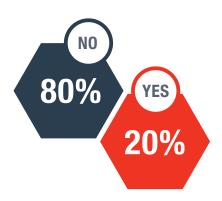

Market observations:

- In the past 12 months, temporary and contract headcount for customer service roles has been constant and is expected to remain stable in the coming year.
- This is due to an ongoing reliance on temporary solutions for customer service roles, as global organisations face headcount restrictions from international parent companies.
- Australian small to medium-sized organisations have greater flexibility to hire permanent staff.

Average length of contract/temporary employment period

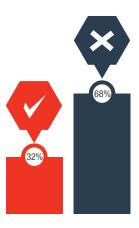

Company operations outsourced outside of Australia

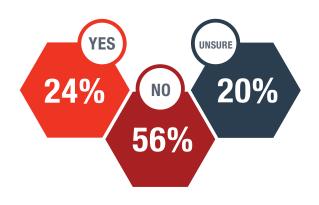

Market observations:

 Companies choosing to outsource customer service operations overseas have the ability to consolidate teams across the region for greater cost efficiency and to effectively manage headcount to deliver campaigns.

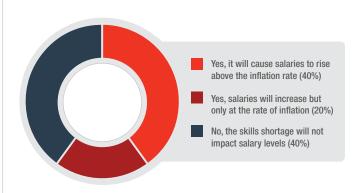

Company operating with a shared service centre (SSC)

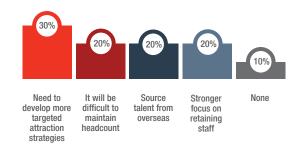

Expectation of a professional skills shortage in the next 12 months

Skills shortage placing upwards pressure on salaries

Impact of skills shortage on businesses in Australia over the next 12 months

Salary increases over the next 12 months

All my employees will receive the same percentage increase

All my employees will receive an increase, but it will vary according to performance

Only my best-performing employees will receive an increase

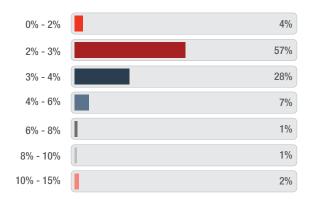

No one in my team will receive an increase

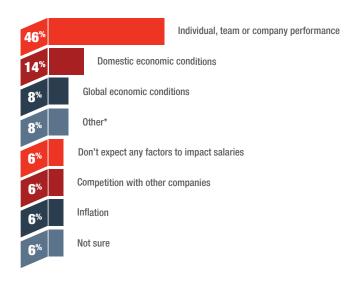

Market observations:

- Salary and remuneration trends for customer service staff over the past 12 months have been consistent and in line with previous years.
- With trading conditions currently stable, significant increases to salaries are not expected in the coming year.
- Customer service professionals in NSW typically attract higher salaries, given the high volume of multinational organisations with head offices in Sydney.

Average percentage salary increase over the next 12 months

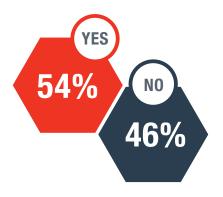

Factor most likely to impact salary levels in the next 12 months*

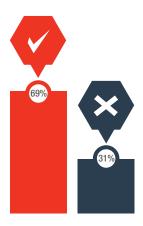

*Government policy and funding, etc.

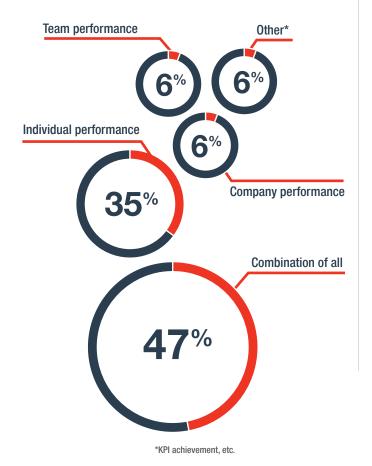

Flexible salary packaging or fringe benefits offered to employees

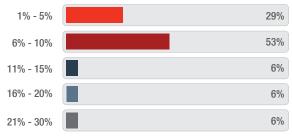

Companies providing bonuses as part of the remuneration package

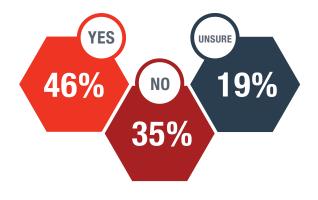

Basis for bonuses over the next 12 months

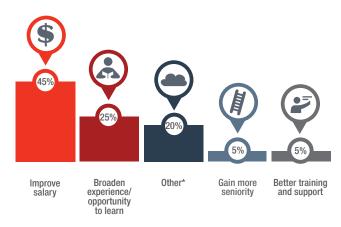

Average percentage bonus of gross salary

Employer expectations for staff turnover in the next 12 months

Key reason employees are likely to leave

*difficult working conditions, etc.

Most popular tools for attraction and retention

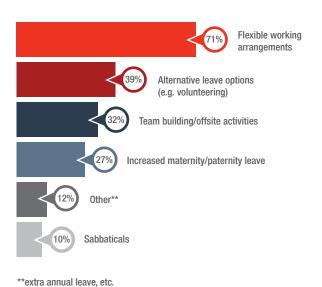

**salary sacrifice, etc.

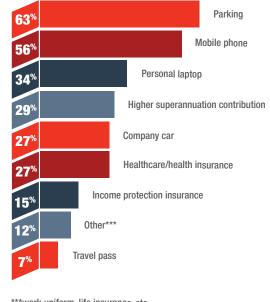

Market observations:

- Most customer service professionals prefer a mix of financial and non- financial rewards from their employer.
- Employees have a strong desire for clearer direction on career progression opportunities and the best organisations are offering this as a key retention tool.
- Employers also have a focus on creating a brilliant company culture and rewarding positive behaviour.

Most popular options offered to support employees' work/life balance*

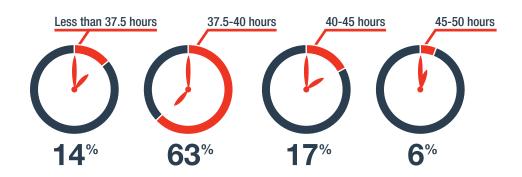

Combination of benefits offered to employees*

***work uniform, life insurance, etc.

Please note:

^{1.} Salaries indicated are based on annual basic salary, including superannuation at 9.5%, excluding bonus/incentive schemes. 2. Small to medium companies are defined as having a turnover of less than \$100 million. Large companies are defined as having a turnover of more than \$100 million. 3. Market rates are becoming much less uniform. While we have taken great care, these salary ranges can only be approximate guides, as there are often specific circumstances relating to individual companies. Please call us for additional information.

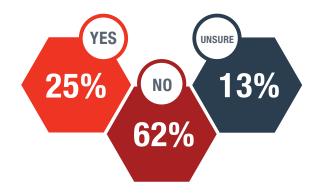

Strength of current hiring activity compared to the last 12 months

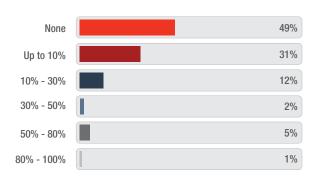

Expecting to increase headcount

Market observations:

- Currently, the strength of overall hiring activity for finance professionals is average. This is expected to continue in the coming year as no material shift in recruitment is likely in the next 12 months.
- Recruitment for finance professionals is strongest in the retail sector as multinational retail businesses continue to recognise the Australian market as having strong growth potential and establish operations in the country.
- Hiring is also strong within the NSW state government as it continues
 to centralise operations, resulting in high-calibre talent being recruited
 to support newly created shared service centres. In addition, large
 multinational organisations, the majority of which have head offices
 based in NSW, are actively recruiting finance staff.
- Payroll professionals and talent with skills in accounts payable and receivable are in demand within small to medium-enterprises (SMEs) and will continue to be sought-after in the coming 12 months.
- Experience in large shared service centres, navigating a matrix
 organisation and managing a high volume of transactional work, as
 well as specialist payroll professionals are in particularly high demand.
 This is being driven by the continued investment in technology by
 finance functions looking to gain efficiencies such as scanning and
 Electronic Data Interchange (EDI), as well as those moving to large
 shared service centres.

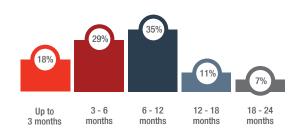

Percentage of team employed on contract/temporary basis

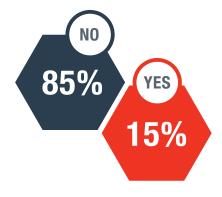

Market observations:

- In the past 12 months, temporary and contract headcount for finance roles has increased. Over the coming 12 months, staff numbers are expected to remain at this level.
- Payroll Officers, Credit Officers and well-rounded accounts professionals are in most demand on a temporary or contract basis.

Average length of contract/temporary period

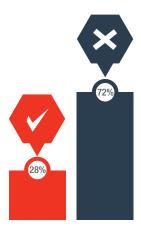

Company operations outsourced outside of Australia

Market observations:

- In companies where Australia represents a small part of the business, outsourcing finance operations overseas ensures efficiency on a global scale.
- Outsourcing operations overseas can also achieve cost reductions and implementation of global best-practice processes.

Company operating with a shared service centre (SSC)

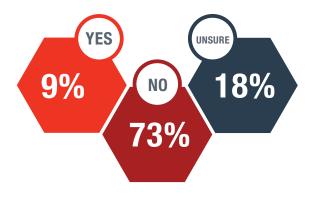

Market observations:

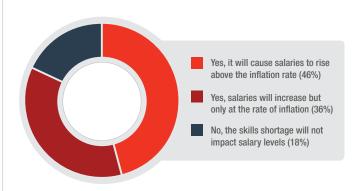

- Companies choosing to operate with a shared service centre (SSC) gain efficiency with decentralised Australian operations and can implement best-practice, Australia-wide processes and achieve a greater level of control.
- SSCs may also be used so there is a consistent technology platform which allows ease of comparison between business units.

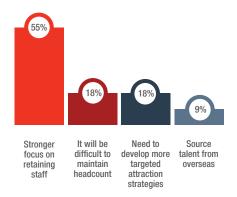

Expectation of a professional skills shortage in the next 12 months

Skills shortage placing upwards pressure on salaries

Impact of skills shortage on businesses in Australia over the next 12 months

Salary increases over the next 12 months

All my employees will receive the same percentage increase

All my employees will receive an increase, but it will vary according to performance

Only my best-performing employees will receive an increase

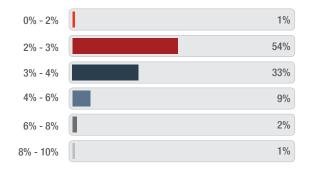

No one in my team will receive an increase

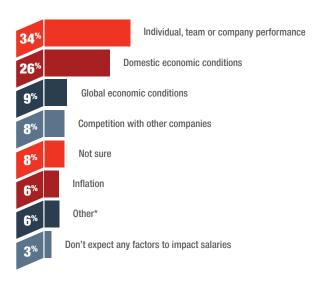

Market observations:

- Salary and remuneration trends for finance professionals over the past 12 months have been in line with previous years and remain stable.
- Shared Service Centre Managers and Directors will be awarded with above average increases as they are able to command higher-than-average salary increments with their implementation experience.

Average percentage salary increase over the next 12 months

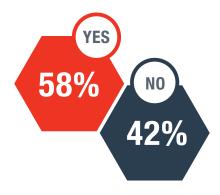

Factor most likely to impact salary levels in the next 12 months*

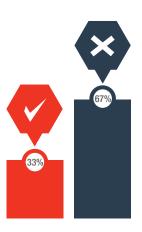

*Government funding, etc.

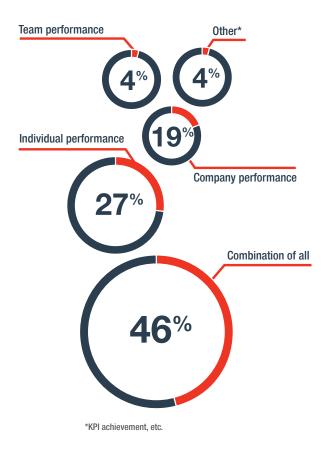

Flexible salary packaging or fringe benefits offered to employees

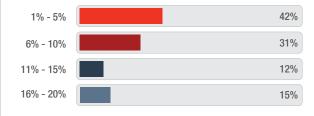

Companies providing bonuses as part of the remuneration package

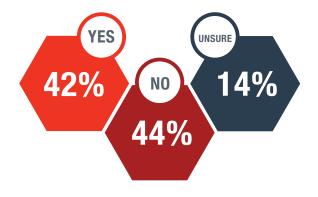

Basis for bonuses over the next 12 months

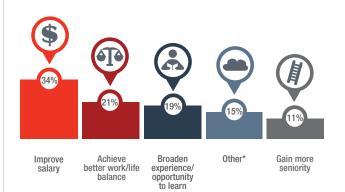

Average percentage bonus of gross salary

Employer expectations for staff turnover in the next 12 months

Key reason employees are likely to leave

*career change, company culture, maternity leave, etc.

Most popular tools for attraction and retention

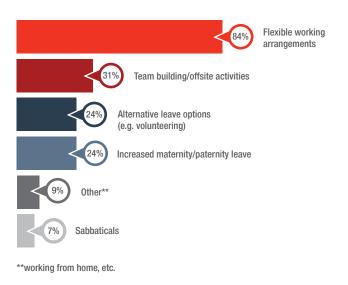

Strong company culture	38%
Structured career progression	18%
Work-life balance initiatives	17%
Recognition and rewards	12%
Training and mentoring partnerships	9%
Global career opportunities	4%
Other**	2%

**salary increases, etc.

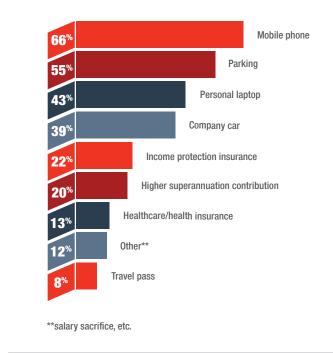

Market observations:

- Most finance professionals prefer financial rewards, however many also seek opportunities for professional development.
- The best organisations are offering clearer direction on career progression opportunities as a key retention tool. This can be challenging in large organisations that have rationalised structures and reduced levels of leadership positions. However, some businesses are focusing on differentiating themselves as an employer of choice by continuing to drive structured career progression and continued learning for their staff.

Strength of current hiring activity compared to the last 12 months

Expecting to increase headcount

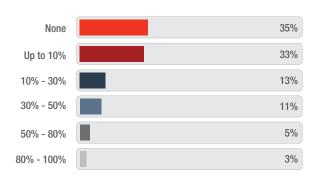

Market observations:

- Currently, hiring for office support professionals is strong. This is
 expected to continue in the coming year as no material shift in
 recruitment activity is likely to occur in the next 12 months. Also,
 hiring levels are anticipated to be consistent with the past 12 months.
- NSW is experiencing the highest level of hiring activity, specifically
 for temporary office support roles. The majority of head offices for
 multinational companies are based in NSW and they continue to rely
 on temporary resources to avoid having to get permanent headcount
 approval.
- Team Assistants, Administration Officers and Office Managers are in highest demand and will remain sought-after over the coming year.
- Team Assistants are required to support larger teams than that of an Executive Assistant or Personal Assistant role. The biggest shift from Executive to Team Assistant positions has been within financial services, where traditionally a high number of Senior Executive Assistants have provided one-to-one support.

- Administration Assistants and Office Managers who can provide
 well-rounded business support are in high demand within small to
 medium-enterprises (SMEs). This is due to administration and
 transactional finance roles being consolidated as businesses
 continue to delayer and gain efficiencies.
- SMEs continue to be more nimble with hiring permanent office support staff compared to large organisations, but seek professionals who are able to fulfill multiple functions in their role.
- Well-rounded administrative skills, including bookkeeping skills within SMEs, and the ability to support multiple stakeholders are in particularly high demand.

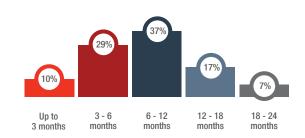

Percentage of team employed on contract/temporary basis

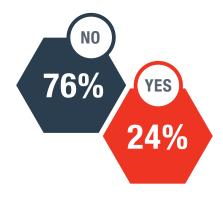

Market observations:

- In the past 12 months, temporary and contract headcount has increased. Over the coming 12 months, staff numbers are expected to remain at this level.
- Receptionists, Executive Assistants and data entry professionals are most sought-after on a temporary or contract basis.

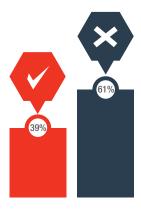

Average length of contract/temporary employment period

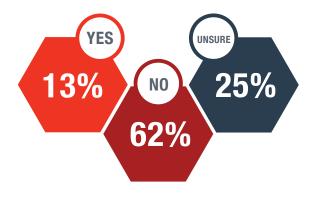

Company operations outsourced outside of Australia

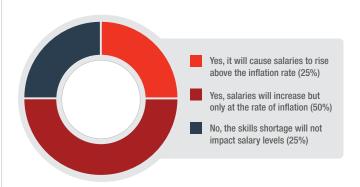

Company operating with a shared service centre (SSC)

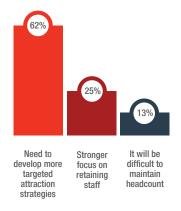

Expectation of a professional skills shortage in the next 12 months

Skills shortage placing upwards pressure on salaries

Impact of skills shortage on businesses in Australia over the next 12 months

Salary increases over the next 12 months

All my employees will receive the same percentage increase

All my employees will receive an increase, but it will vary according to performance

Only my best-performing employees will receive an increase

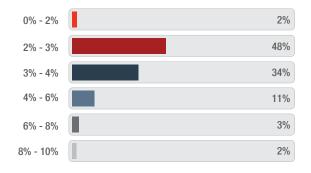

No one in my team will receive an increase

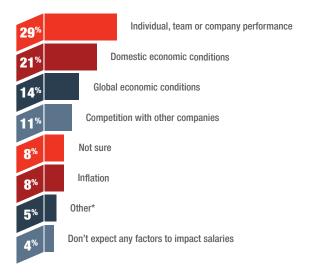

Market observations:

- Salary and remuneration trends for office support staff over the past 12 months have been consistent and in line with previous years. With trading conditions currently stable, significant increases to salaries are not expected in the coming year.
- Salaries for Senior Executive Assistants within financial services and large multinational organisations have been rationalised, linked to trends in executive level salaries.

Average percentage salary increase over the next 12 months

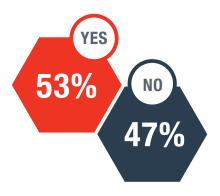

Factor most likely to impact salary levels in the next 12 months

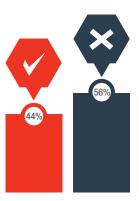

*Government funding and policy, etc.

Flexible salary packaging or fringe benefits offered to employees

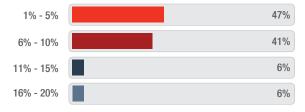

Companies providing bonuses as part of the remuneration package

Most popular tools for attraction and retention

Strong company culture	51%
Work/life balance initiatives	15%
Structured career progression	14%
Training and mentoring partnerships	10%
Recognition and rewards	10%

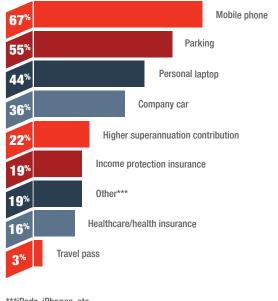

Market observations:

- Most office support staff prefer to receive financial rewards from their employer.
- Some employers are focused on additional work/life balance initiatives. This includes reviewing and improving maternity/paternity leave policies and offering the ability to purchase additional annual leave or other types of leave, like birthday leave.
- More structured career progression initiatives, including support with study to facilitate this progression, is being offered by some companies.
